Figure 1 is a schematic diagram of the experimental setup for the fire test. It shows a furnace (器具) placed on a base. A power cable (電源線) is connected to the furnace. The furnace is surrounded by insulation material (断熱材). Dimensions are indicated: 10 cm or more for the distance from the power cable to the furnace, 10 cm or more for the distance from the furnace to the insulation, and 20 cm or more for the height of the insulation. The furnace itself is 10 cm or more high.
