## Introduction

What is LiFIT App?

- LiFIT App is a service that works with Condominiums HA systems including security intercoms to watch and control the safety and security of an apartment from smartphones/tablets via the Internet.
This service is available to residents of condominiums with LiFIT service agreement.

How-Tos

Things you can do with LiFIT App

Using the LiFIT App

Comfirming recommended devices and wireless LAN routers

Connecting a smartphone/tablet to the wireless LAN router

Registering a smartphone/tablet

Remotely controlling the Base Unit "Security"

Remotely controlling the Base Unit "Control"

Remotely controlling the Base Unit "Record"

Remotely controlling the Base Unit "Convenient feature"

Service usage extension

Inquiring registered devices

Deleting a registered device

Changing the passcode

Initializing the mobile settings

Stopping the service

Changing settings

Cautions when using

Things you can do with LiFIT App

For details on various functions such as Not Home setting and security settings, refer to Clouge's instruction manual.

Notification services

- Alarm
  Send out a push notification to smartphones/tablets when any of the sensors within an apartment operates. Send out a push notification also when a sensor recovers.

- Visitor
  Send out a push notification when a call comes in from the Main Entrance intercom or door phone slave device with camera. If "Record visitor picture" is set, a picture of the visitor is taken and saved to Panasonic's server for later confirmation (of the still picture).
  When the confirmation is completed and it is no longer needed, it can be deleted individually or collectively.

- Return home[*]
  Send out a push notification to smartphones/tablets when the entrance is unlocked by using an ID Auth Key or Private Passcode, when the CALL button of the door phone slave device with camera is long-pressed, or when the electric door lock is unlocked. If "Record return home picture" is set, a picture of the family member is taken and saved to Panasonic's server for later confirmation (of the still picture).
  When the confirmation is completed and it is no longer needed, it can be deleted individually or collectively.

- Delivery[*]
  Send out a push notification when a package is delivered to the delivery box at the entrance, each floor, or each apartment. It can also notify you that a delivery has arrived when you approach your home, in combination with GPS on your smartphone/tablet.

- Security[*]

  Send out a push notification of the changed status to smartphones/tablets when the security status setting is changed. It can also notify you that the security setting is not enabled when you have left home, in combination with GPS on your smartphone/tablet.

- Confirm lock[*]

  Send out a push notification of the apartment door lock status and security status to smartphones/tablets when the security status setting is changed. It can also notify you that the door is not locked when you have left home, in combination with GPS on your smartphone/tablet.

- EV charging[*]

  Send out a push notification to smartphones/tablets when EV charging has completed.

- New Info

  Send out a push notification to smartphones/tablets when new information is posted on the base unit News board.

- Schedule

  Send out a push notification to smartphones/tablets when a schedule is posted on the base unit News board.

Remotely control

- Switch the security setting[*]
  The "Security setting" mode of the base unit can be remotely switched by using a smartphone/tablet from the outside.

- Switch the Not Home setting
  The "Not Home" mode of the base unit can be remotely switched by using a smartphone/tablet from the outside.

- Remotely stop the alarm sound
  The sound of alarms inside an apartment can be remotely stopped by a smartphone/tablet from the outside. (Not applicable to fire or gas leak alarms.)

- Remotely control devices※
  You can remotely control various devices in your home from the outside by using your smartphone/tablet.

Device name	Things you can operate	Things you can check
Air conditioner	Turn on/Turn off, Operation mode change (Auto/Cooling/Heating/Dehumidifying), Temperature, Air quantity, Direction of airflow	Operating status, Set temperature, Air quantity, Air direction, Room temperature, Room humidity, Outdoor temperature, Power saving status
EcoCute	Bath Auto/Turn off, Boost heating operation	Remaining water, Bath temperature setting, Remaining water by step (0 to 5), Boost heating status
Enefarm	Power generation On/Off, Bath Auto/Turn off	Power generation status, Bath temperature setting, Remaining water by step (0 to 5)
Gas water heater	Bath Auto/Turn off	Bath temperature setting
Air Cleaner	Turn on/Turn off, Operation mode change (Auto/Low/Medium/High/Turbo), Ventilation mode (Auto/Low/High/Stop)	Operating status, Operation mode, Ventilation mode, House dust, Odor, PM2.5
Light	Light on/Light off, Light control	Lighting status, Light control setting status
Electric Lock	Lock	Lock status
Electric blind	Opening degree (Open/1 to 4/Closed), Angle (1 to 5)	Opening degree, Angle

Floor heating	Turn on/Turn off	Operating status, Level setting (1 to 15/Auto)

Confirm

- Visitor record
  Allows you to confirm a list of your visitors. Furthermore, if "Record visitor picture" is set, you can also confirm his/her (still) picture with a smartphone/tablet as one is taken and saved to Panasonic's server. These records are retained for one month.
  When the confirmation is completed and it is no longer needed, it can be deleted individually or collectively.

- Alarm record
  Allows you to confirm sensor operation records from a smartphone/tablet. These records are retained for three months.

- Return Home Notification record*
  Allows you to confirm a list of your family members that returned home. Furthermore, if "Record return home picture" is set, you can also confirm the (still) picture of your family member with a smartphone/tablet as one is taken and saved to Panasonic's server. These records are retained for one month.
  When the confirmation is completed and it is no longer needed, it can be deleted individually or collectively.

- Apartment door lock status*
  Allows you to confirm your apartment door lock status.

- Alarm
  Allows you to confirm alarm status from your smartphone/tablet.

- Not Home setting
  Allows you to confirm Not Home setting status from your smartphone/tablet.

- Security setting*
  Allows you to confirm Security setting status from your smartphone/tablet.

- News
  Allows you to confirm information on the base unit News board from your smartphone/tablet.

Caution

* Available services vary depending on your apartment's contract, settings, and home devices.

Using the LiFIT App

Required devices and environment

Base Unit 	1M Type Security Intercom Base Unit for Condominiums HA Clouge
Base Unit 	1M Type Security Intercom Base Unit for Condominiums HA Clouge
Smartphone Tablet[1]	Android or iOS device Installation of LiFIT App required.
LiFIT service agreement	LiFIT service agreement required.[2]
Internet connection environment[3]	Internet connectivity required for your smartphone/tablet. Also, it is necessary that the Base Unit and smartphone are connected to the same Internet network to enable automatic service extension.
Wireless LAN router※1※3	The wireless LAN router is recommended for connecting the smartphone/tablet.

*1: For information on recommended devices and devices whose operation are confirmed, please refer to our company's website.
Note that some devices are not supported.

*2: Depending on your apartment, "LiFIT App Contract" may or may not be displayed under "Register" by touching "Mobile" on the Base Unit. Also, the o

peration method may vary depending on whether "LiFIT App Contract" appears.

The operation method in the instruction manual is also written, so please refer to that according to the display on your Base Unit.

*3: Connecting your smartphone/tablet to the same network as the Base Unit allows you to automatically extend your service expiration date.

Caution

- If you buy a new smartphone/tablet, delete the registration information of the previous device from the base unit and register again with the new smartphone/tablet.

Connecting a smartphone/tablet to the wireless LAN router

Using the LiFIT App with connecting your smartphone/tablet to a wireless LAN, please refer to your smartphone/tablet operating instructions. (The following is an example.)
 1. Set Wi-Fi to "ON".
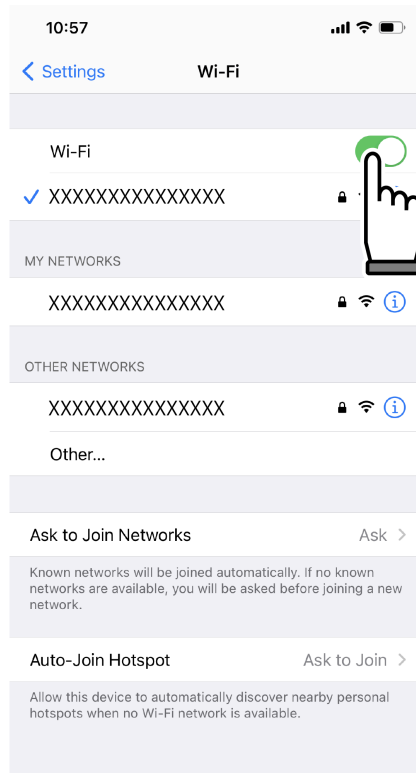

2. Choose a wireless LAN router.
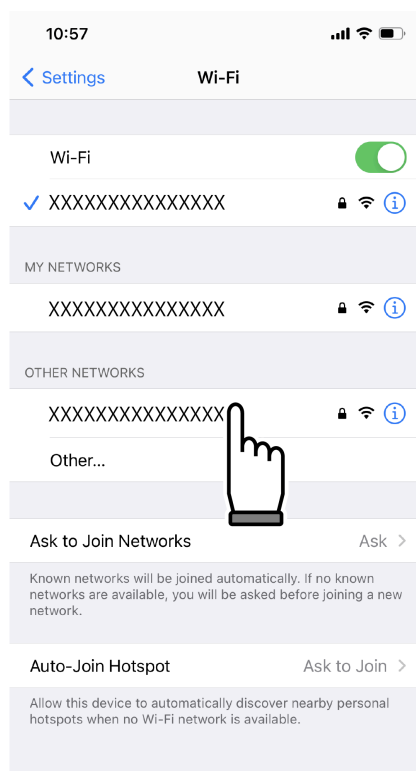

3. Enter the password. (When setting for the first time.)
   The connection is completed if 🛜 (the antenna icon) is displayed.

Caution

- Wireless settings and behavior during sleep mode vary depending on the smartphone/tablet. For details, please refer to your smartphone/tablet operating instructions.
- The app may not run correctly depending on the smartphone/tablet connection status.
  - When wireless LAN is disabled by a task killer or energy saving application. (Please revise your application settings.)
  - When simultaneously using Wi-Fi Direct or tethering feature.
  - Depending on the energy saving settings of your smartphone/tablet, you may not be able to operate normally when the LiFIT app runs in the background, therefore set the setting correctly. In the case of Android, the name of the energy saving setting differs depending on the device, such as battery optimization. Check the instruction manual of each device.

Registering a smartphone/tablet

The following describes the procedure to start using LiFIT App. Make settings by following the indicated steps.

Preparation

1. Prepare a smartphone/tablet with Internet connectivity.
   To use LiFIT App, you need a smartphone/tablet with Internet connectivity to access the base unit. That connectivity may be from a telecommunications carrier or through your home wireless LAN.
   For the connection method, please refer to your smartphone/tablet operating instructions.

2. Install LiFIT App.

3. Prepare a Club Panasonic ID.
   To use LiFIT App, a Club Panasonic ID is required. It can also be acquired while registering your smartphone/tablet for the first time.

4. Connect the Base Unit to the Internet.
   By connecting the base unit to the Internet and connecting the smartphone/tablet to the same network, the service usage can be automatically extended without operating the base unit.

Caution

- If you do not allow the notification settings on the smartphone/tablet, you will not be able to complete the usage registration. Be sure to allow the notification settings before the registering.
- LiFIT App uses the local network to communicate with the base unit.
  If you do not make this setting, the automatic extension of service automatic extension will not be implemented, so you must set it.
  Please set by one of the following methods.

1: Set a permission during the startup message of the application

When you start the app, the message "LiFIT wants to find and connect to a device on your local network." is displayed. Tap "OK" to set it.

2: Set a permission from "Settings" on the device

Set "LiFIT" to "ON" from "Settings" → "Privacy & Security" → "Local network" of the iPhone/iPad device.*

* For iOS17 (Settings may differ for other versions.)

Register with (agree to the privacy policy) the condominium server from the Base Unit.

Before registering a smartphone for the first time, you are required to register with (agree to the privacy policy) the server associated with this service from the Base Unit.

1. With the Base Unit in standby mode (nothing displayed on its screen), touch [HOME].
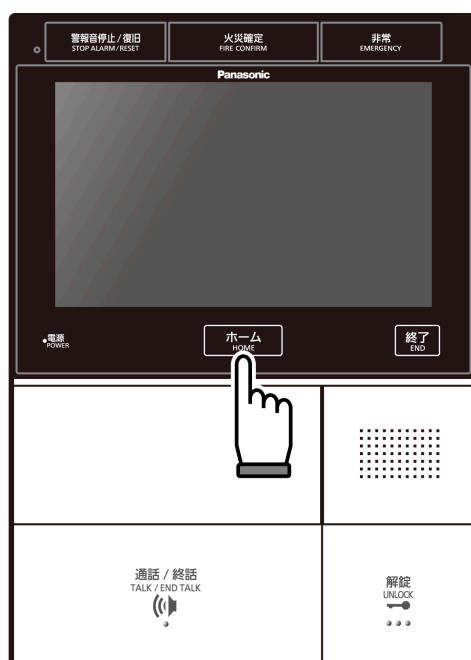

The Home screen displays.

2. Touch "Setting".
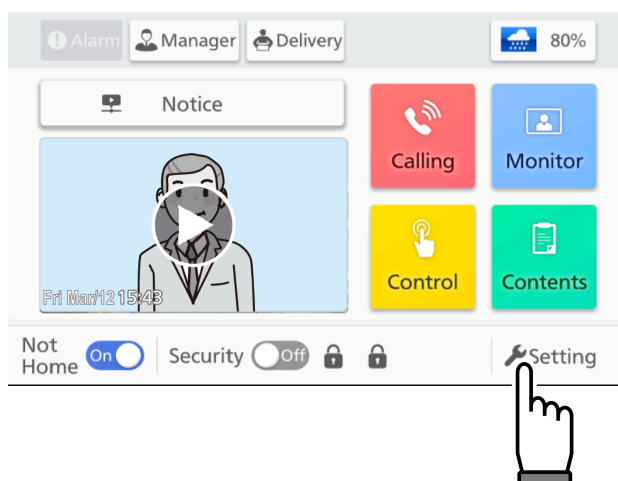

3. Touch in the following order: "Service" → "Register".

4. The Privacy policy display. Confirm their content and touch "Agree" if you agree with them.
   Agreeing to the Privacy Policy enables you to register your smartphones/tablets.
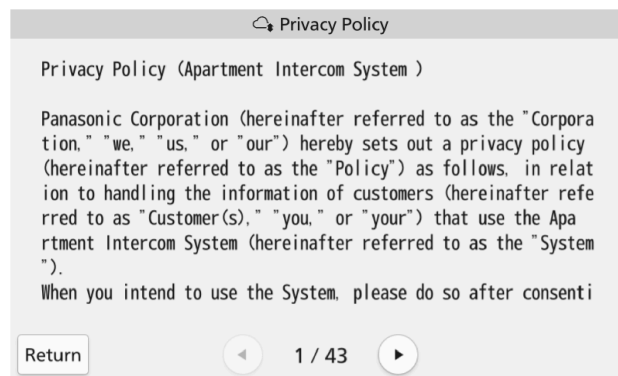

* Confirm the Privacy Policy that display on the screen.

Registering a smartphone/tablet with the Base Unit

1. With the Base Unit in standby mode (nothing displayed on its screen), touch [HOME].
   The Home screen displays.

2. Enable registration on the Base Unit.
   Put the Base Unit into registration mode by following the procedure below. Then, make the registration from your smartphone/tablet.

   ○ Touch "Setting".
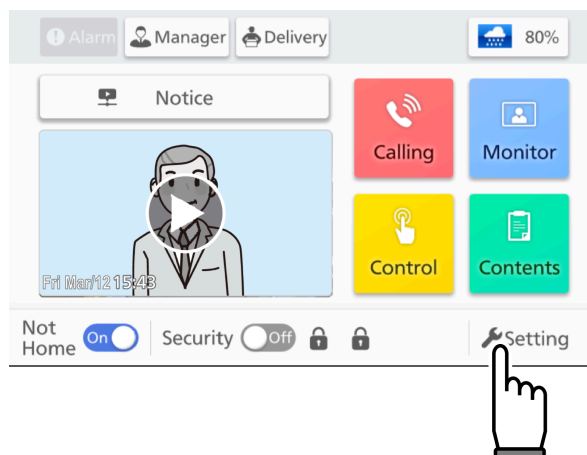

○ Touch buttons in the following order: "Mobile" → "Register".
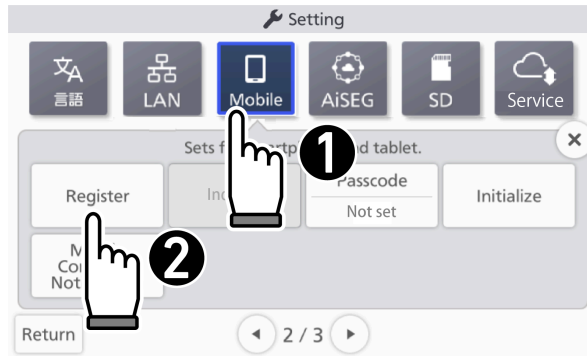

The Passcode setting confirmation screen displays.

> **Caution**
>
> - If a passcode is already set, proceed to passcode entry screen.
> - At this time, if "LiFIT App Contract" appears under "Register", credit card registration will be required. Please follow the "LiFIT App Contract procedure" for registration.
>
>
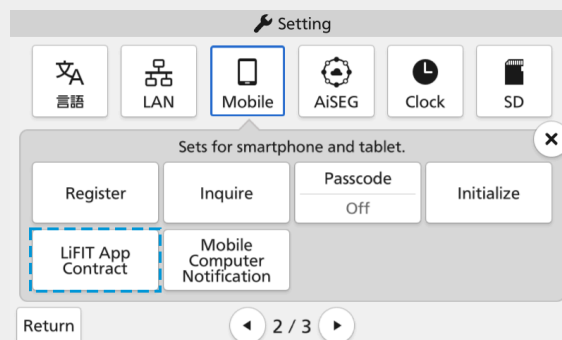

○ Touch "Confirm".
The Mobile Computer Passcode screen displays.

○ Choose either "Off" or "On" and touch "Confirm".

Off	No passcode is necessary to use the smartphone/tablet.
On	A passcode is necessary to use the smartphone/tablet.

If you touch "Off", the screen returns to the Setting (Mobile) screen.

If you touch "On"

Set a passcode by following the procedure below.

Caution

- The passcode must be a 4-digit numeral, where each digit is a number from 0 (zero) to 9.

- Do not forget the passcode.

1. Enter a 4-digit passcode.
   The input passcode displays.
   If there is an error in the entered passcode, touch "Clear". All of the digits are cleared.

2. Touch "Confirm".
   The passcode is set, and the screen returns to the Setting (Mobile) screen.
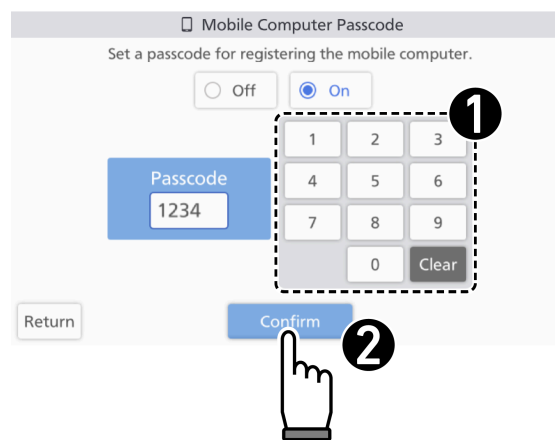

○ Touch "Register".
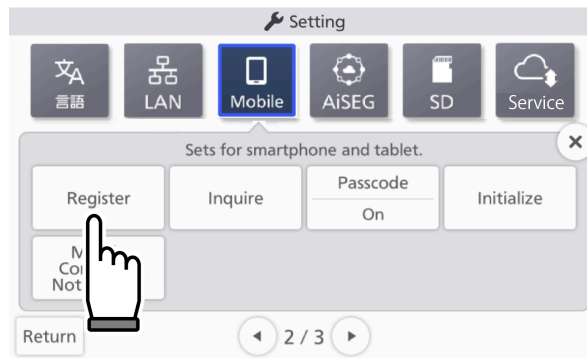

The Enter passcode screen displays.

> **Caution**
>
> If you set "Off" of passcode and touch "Register", proceed to Register Mobile Computer screen.

○ Enter the set passcode and touch "Confirm".
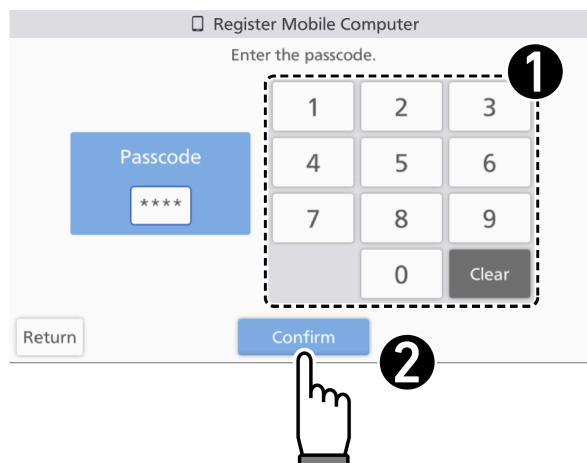

The input passcode displays as asterisks (*).

○ Register Mobile Computer screen displays. Confirm available apps and touch "Register".

Register Mobile Computer

The following apps are available.
Please press the register button to display the QR code.

LiFIT App
Dedicated App "Intercom"

Return   Register

○ A QR code displays.

Register Mobile Computer

Please register by reading the QR code on your mobile computer.

Return
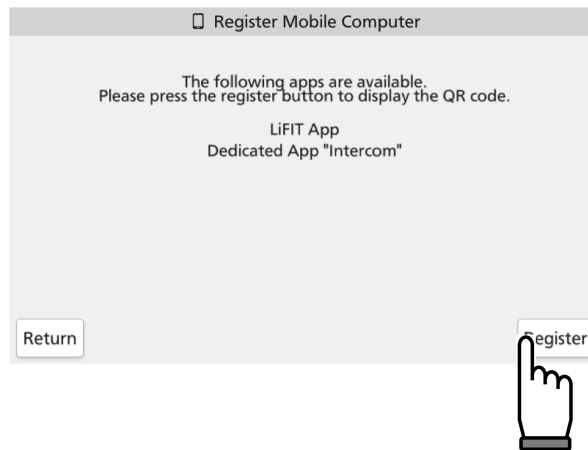

* Complete the registration within 15 minutes after the QR code is displayed.

3. Start the registration.

- Check the displayed screen and proceed to read the QR code in step 4.
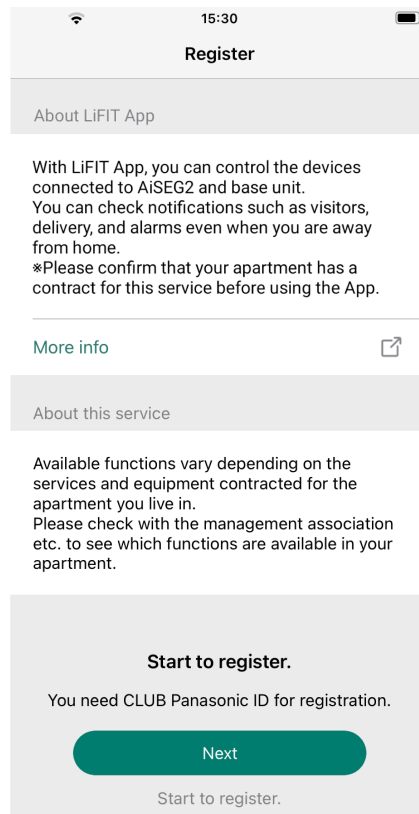

Caution

- If you register with the VPN connection worked on your smartphone/tablet, registration may fail. Turn off the VPN connection and register.

4. Read the QR code to register the smartphone/tablet.
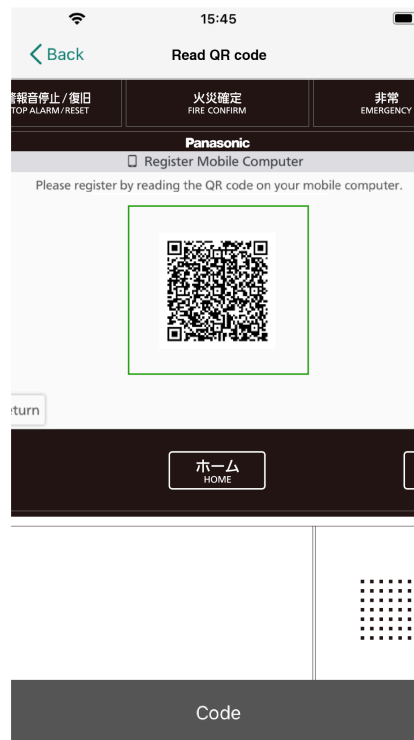

5. Tap the "Start using LiFIT App".
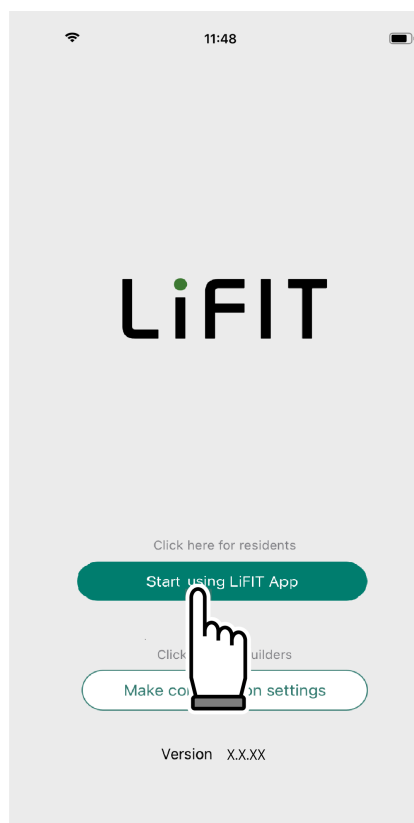

- Tap the "Start using LiFIT App" on the next displayed screen.

6. Enter the Club Panasonic Login ID and password.
   - The characters displayed on the screen are in Japanese.
   - If you don't have a Panasonic Login ID, touch "新規登録" to acquire one.

Caution

- If you encounter any Login problems, such as not being able to receive a confirmation email during new registration, go to "If you have any problems, click here" on the "Caution: Login Page" screen and tap the inquiry button for CLUB Panasonic ID, and Please contact us.

- When logging in / out on an iOS device, the following message will be displayed. Tap "Continue". If you do not tap it, you will not be able to log in / out.

  "LiFIT" Wants to Use "panasonic.com" to Sign In.

○ You can also login with your social account. Check the displayed screen and login.

7. Agree to the Terms of use, the Privacy policy and Google Analytics.

 * Confirm the Terms of use, the Privacy policy and Google Analytics that display on the screen.
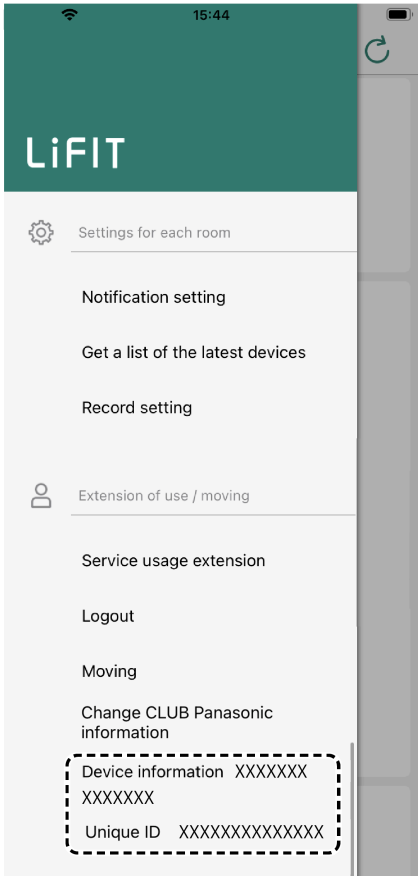

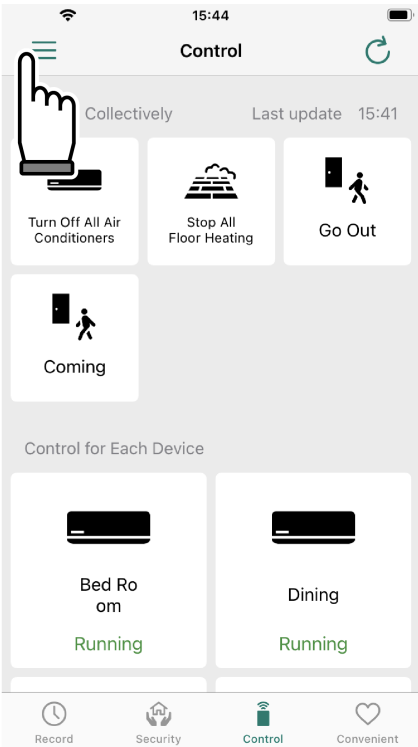

8. A registration complete message displays when registration with the server is completed. Touch "Confirm" and complete the registration.
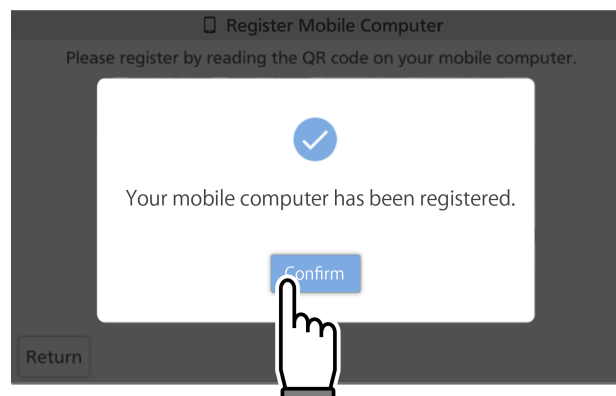

Caution

Registration takes approximate 30 seconds.

The service is ready for use when information about the Base Unit and connected devices displays on the smartphone/tablet screen.

Caution

- You can register up to a total of six smartphones/tablets with the Base Unit.
  * Uninstalling and then re-installing the application on a smartphone/tablet may add it as a different device due to an OS limitation. In such a case, delete the previous device registration from the Base Unit.

- Only one Base Unit can be registered in the LiFIT app. If you want to use this application on multiple Base Units, prepare a smartphone/tablet for each Base Unit.

- When using multiple smartphones/tablets for multiple Base Units, registering with the same Club Panasonic ID will not work properly due to system restrictions.
  When registering to another Base Unit, prepare a club Panasonic ID different from the club Panasonic ID used by the Base Unit and register it.

LiFIT App Contract procedure

When "LiFIT App Contract" is displayed under "Register" by touching "Mobile" on the Base Unit, each household needs to make a LiFIT App usage contract.
* If "LiFIT App Contract" does not appear, this menu will not be displayed.
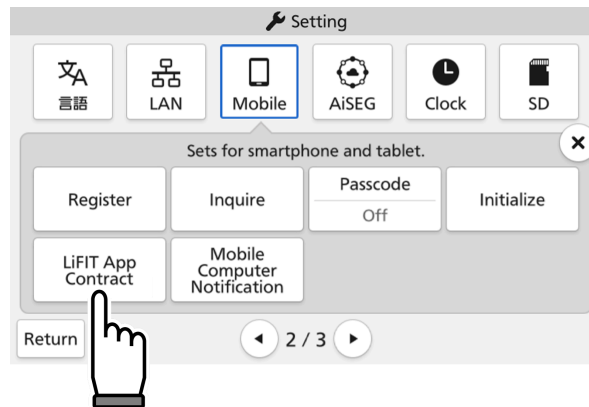

1. In the standby state (blank screen), touch [HOME].
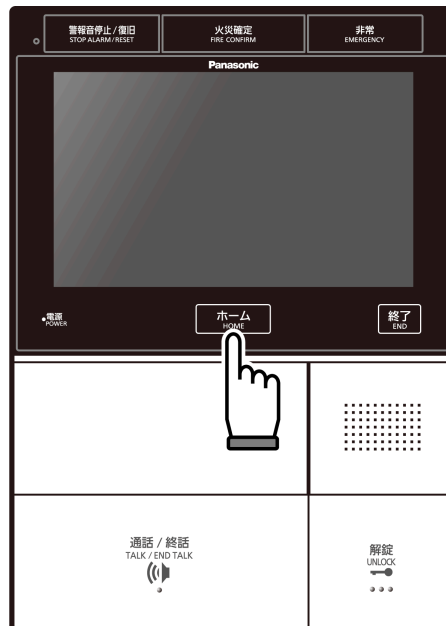

The home screen displays.

2. Touch "Setting".

3. Touch in the following order: "Mobile" → "LiFIT App Contract".

   A QR code displays.

4. Use a camera app on your smartphone/tablet to read the QR code displayed on the Base Unit.
   A website link appears on your smartphone/tablet.

5. Tap the website link.
   Tap the displayed "Sign up" button and follow the website instructions to complete the registration procedure.

> **Caution**
>
> - The LiFIT App is a paid service that requires you to register your credit card on the website.
>
> - The LiFIT App Contract is not through the LiFIT App but by reading the QR code with a camera app.
>
> - If it is already registered, the "Sign up" button will not be displayed.

Remotely controlling the Base Unit

Security

You can remotely control the Base Unit with smartphone/tablet from the outside.

You can also stop the sound of alarms (except fire and gas leak) and lock your apartment door.

1. Tap the "Security" tab, where you can do the following:

   - Confirm a list of alarms within your apartment and stop their sound.

   - Confirm the Not Home setting status and set or cancel absence.

   - Confirm the security setting status and set or cancel the alert.

   - Confirm the status of the electric door lock and lock.
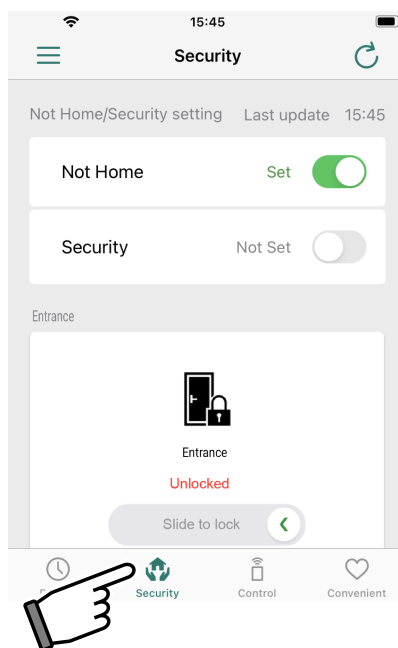

2. Remotely stop the sound of alarms.
   Press the "Stop the alarm sound" button.
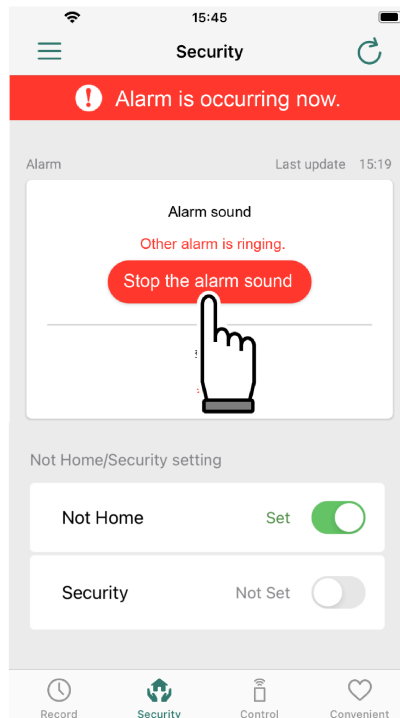

Caution

- Once stopped, you cannot make the alarms sound again.

- The circuit names of the emergency call, general alarm, expansion emergency and security alarm cannot be displayed.

- When stopping the sound of alarms, do so with caution.
  Stopping the sound of alarms may make your family members at home unaware of the alarms.

- This feature only stops the sound of alarms; it does not recover the alarm statuses.

3. Set absence.
   Switch "Not Home setting".
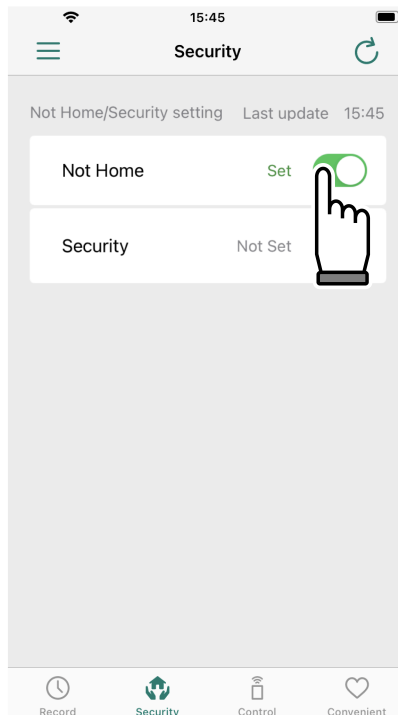

4. Set security.
   Switch "Security setting".
   Magnetic switches detect when security is on (Setting alert on) and the apartment door or a window is opened.
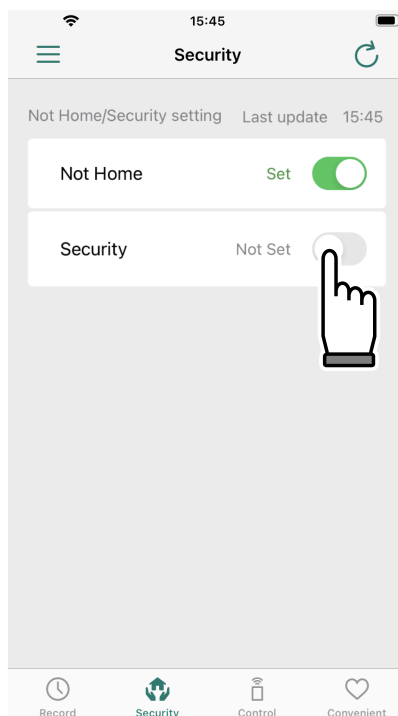

- When "Alert" is switched "On" or "Off" remotely, that change takes effect immediately.
  When setting security remotely, do so with caution.

- Switching "On" the "Alert" remotely may trigger an alarm when the door is opened from the inside to go out.

- If "Alert" cannot be set remotely, a window equipped with a magnetic switch or the apartment door may be open.
  * Where magnetic switches are installed depend on your condominium. For details, contact your condominium management company.
  * This service does not include a feature to remotely control window locks.

- If the passcode is not registered on the base unit, you can only be alert for security settings. You cannot cancel the alert.

5. Lock the apartment door.
   Swipe the "Locked" bar.

- To ensure security, a locked electric door lock cannot be remotely unlocked (opened).

- This feature allows you to lock an electric door lock, but not the condominium entrance.

- Remotely locking your apartment door is not possible if a gas leak has been detected as locking the electric door lock may lead to an explosion by ignition.
Control

You can remotely control devices connected to AiSEG2 from the outside by using your smartphone/tablet.

1. Tap the "Control" tab, where you can do the following:

- Perform "Control Collectively" by the each scene set on the Base Unit.

- Perform "Control for Each Device" connected to AiSEG2.

- The order of the displayed devices may differ from the Base Unit depending on the OS specifications of the smartphone/tablet.
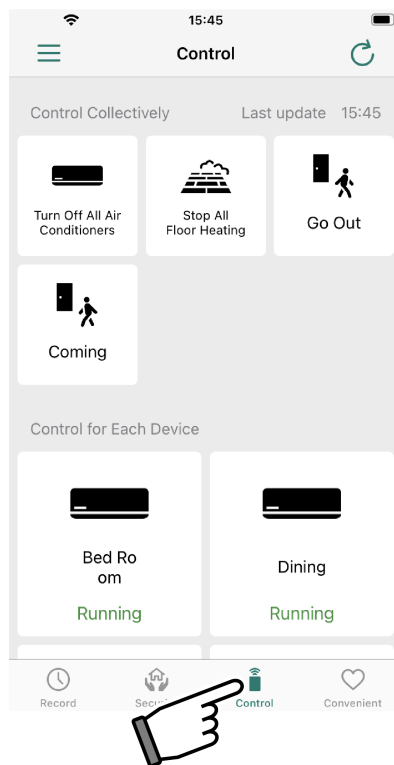

2. Control Collectively.

Tap the item of "Control Collectively".

- ○ Confirm the status before and after using "Control Collectively" for each device to control.

- ○ Confirm precautions to take by tapping "Please operate after confirming the transmitted contents".

- ○ If "Control Collectively" can be executed, press the "Send" button.

- ○ A push notification will arrive afterwards. Press the update button on the "Control Collectively" execution screen to confirm the latest status.

3. Perform "Control for Each Device".
   Press the button of the device to control.
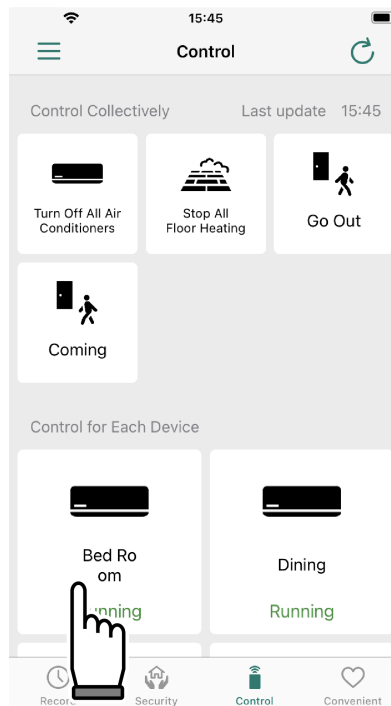

- o Confirm the status before and after executing "Control for Each Device".

- o Confirm precautions to take by tapping "Please operate after confirming the transmitted contents".

- o If "Control for Each Device" can be executed, press the "Send" button.

- o Press the update button to confirm the latest status.

Caution

- Controlling the same device simultaneously may cause it to malfunction.

- When turning on a device (or group of devices), it is (or they are) turned on from the status acquired as a result of the previous operation from a smartphone or Base Unit. Therefore, be sure to turn on after confirming the status that it (or they) will acquire.

- A caution displays depending on the device to control.
  Be sure to confirm the caution before pressing the "Send" button.

- If Enefarm made by another company is registered in AiSEG2, it will be displayed only as a Gas Water Heater. The fuel cell is not registered in AiSEG2 and will not be displayed.

- "Control Collectively" including "Electric Lock" do not display on LiFIT App.

- Depending on the Base Unit settings, entering the passcode may be required to send security setting.

Record (Confirming records)

Confirm the information sent by the Base Unit and server.

> **Caution**
> - If you want to display the visitor image on the screen, you need to turn on the recording of visitors setting in the [Record setting](#).
> - If you want to display the return home image on the screen, you need to turn on the return home notifications setting in the [Record setting](#).

- All
  Allows you to confirm a list of all records. To confirm details, tap "Read more…".
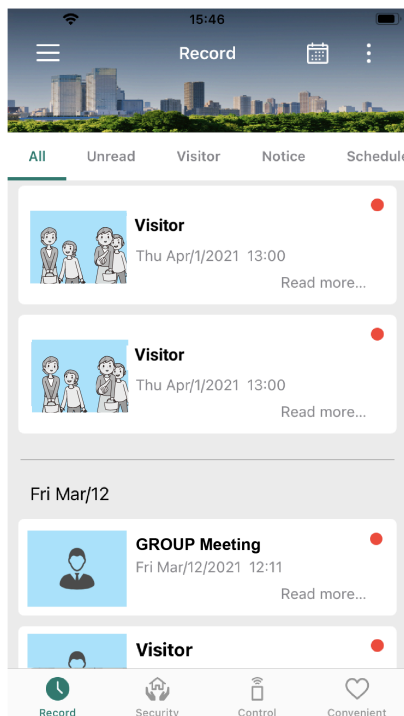

You can check the Alarm in "All".
If an alarm is occurring, "Confirm the alarm" is displayed, and you can tap it to move to the Security screen and stop the alarm sound.

（Example of picture）

Alarm

Fri Mar/12/2021 12:11

Fire Detector Activated has occurred.

Occurred date and time： Mar/12/2022/ 12:11

Confirm the alarm

- Unread
Shows the unread information. To confirm details, tap "Read more…".
（Example of picture）
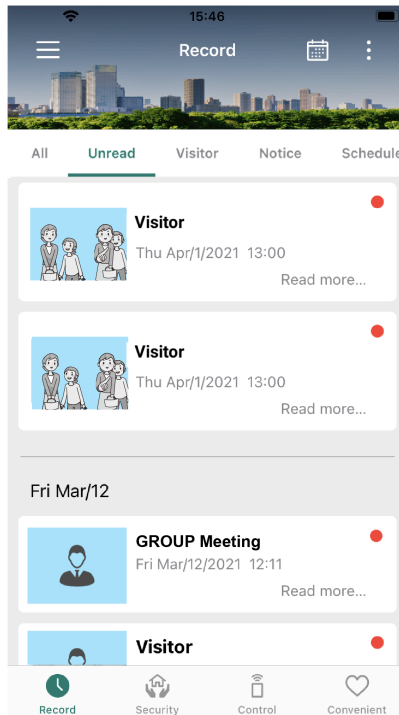

- Visitor
  When a visitor calls from the Main Entrance intercom or do or phone slave device with camera, the visitor's (still) picture is taken and saved to Panasonic's server for one month.
  Pictures can be confirmed also from the outside.
 You can delete it by tapping "delete".

(Example of picture)

Caution

- Even if you delete the visitor information, you cannot delete the information held by the base unit.
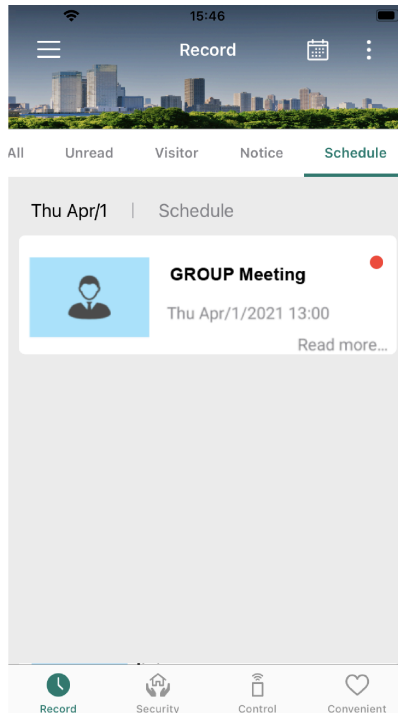

- Notifications
  Shows News, RSVP, and Notices from the system.
  If there is a RSVP, choose the answer and send it back by tapping the "Send" button.

(Example of picture)

- Schedule
  Shows the schedule.
  To register the reminder notification, display the Schedule.

(Example of picture)

<table>
<tr><td>

Caution

- A reminder is set when the Schedule is displayed, and a reminder notification will be sent out at the time specified by the manager.
  You may not always be able to receive reminders at the appropriate time since notifications may not be set correctly depending on your device settings or status.

- Information notified from the base unit or server can be displayed from 2 years ago to 3 years ahead.
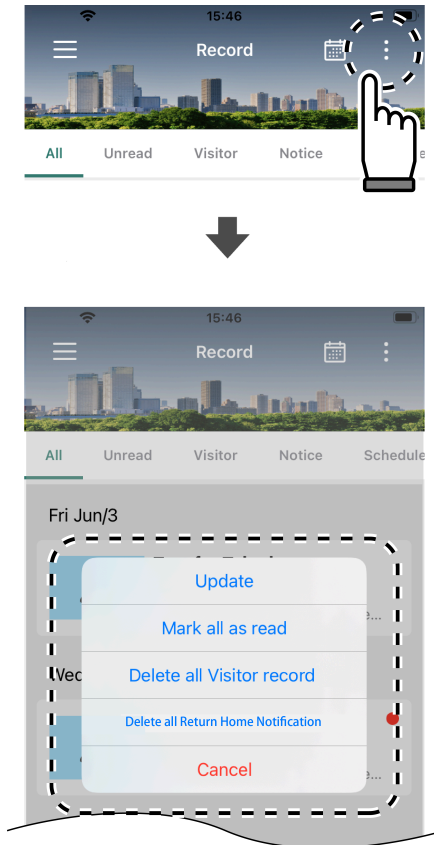

</td></tr>
</table>

- Calendar
  Select the marked date on the calendar and display it.

  (Example of picture)
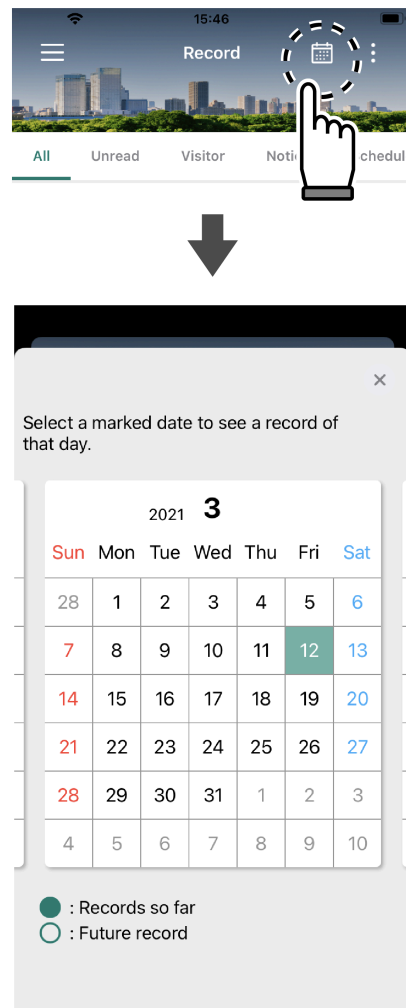

- Update
  Update the latest information.

- Mark all as read
  🔴 Removes all Unread indicators.

- Delete all Visitor record
  Delete all the visitor history at once.

- Delete all Return Home Notification
  Delete all the family return history at once.

Caution

- When the alarm is restored, the history of the alarm is deleted.
- The sentences may not always be displayed as intended by the person who posted it as a result of a line feed misalignment due to the smartphone/tablet model or device font settings.
- Even if you delete the visitor and return home information, you cannot delete the information held by the base unit.
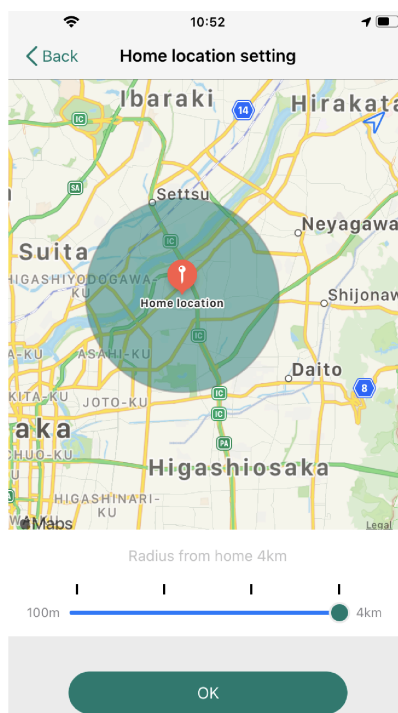

Convenient feature

You can take advantage of Convenient feature that work in combination with GPS and Condominiums HA facilities.
When approaching the set home location, you will receive a notification prompting for operation.
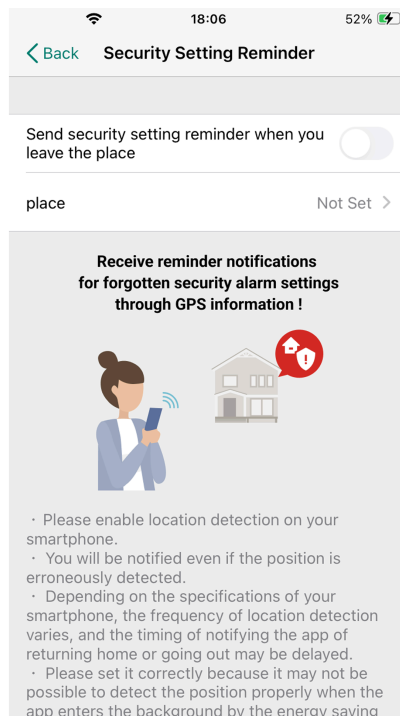

- Home location setting
  Allows you to set the home location and distance from home at which to notify Control collectively when going out or Control collectively when return home.
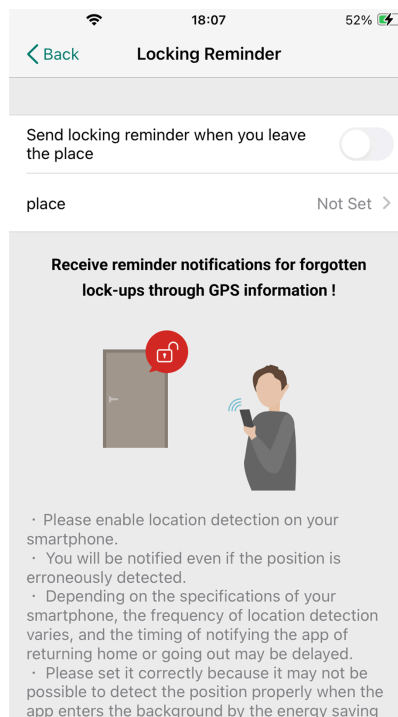

Convenient feature for going out

- Security Setting Reminder
  Detects that you have left home and notifies you of forgotten security setting.

  * To enable Security Setting Reminder, you need to set your home location.

- Locking Reminder
Detects that you have left home and notifies you of forgotten locking.

   * To enable Locking Reminder, you need to set your home location.

- Control collectively when going out
Allows you to prevent leaving things turned on when going out as they can be Controlled Collectively in combination with GPS.

Choose your home location and things you want to control collectively.

* To enable Control collectively when going out, your home location and things you want to control collectively must be specified in advance.

* If AiSEG2 is not connected to the base unit, control collectively cannot be set on the base unit, so "Control collectively when going out" cannot be used.

Convenient Features for Returning Home

- Delivery Notification
  Detects that you are approaching your home and notifies you that a delivery has arrived.

  * To enable Delivery Notification, you need to set your home location.

- Control collectively when return home
  Allows you to return to a comfortable home since you can collectively control your home appliances in combination with GPS on your way home.

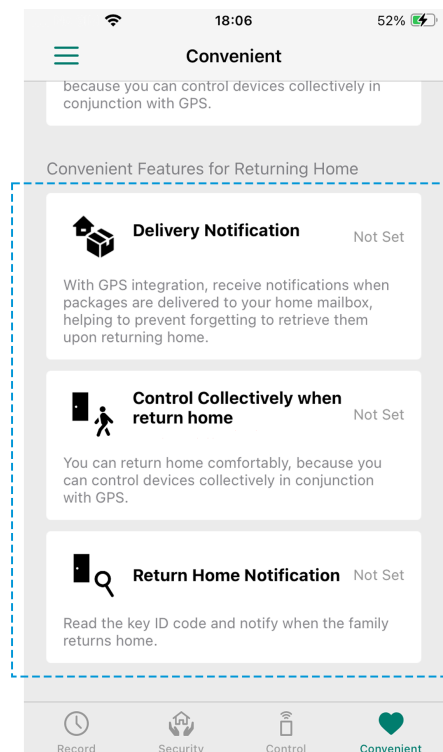

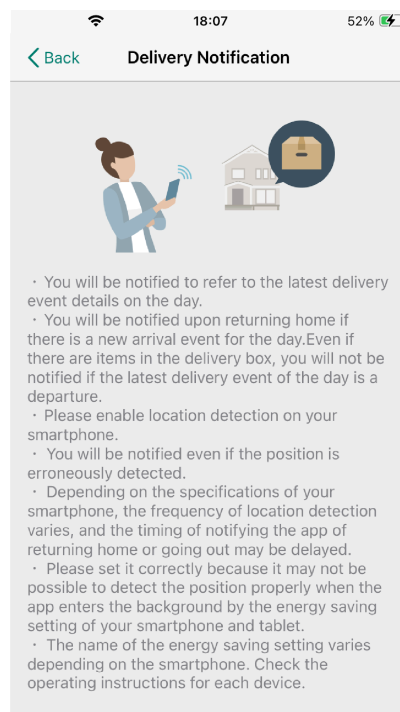

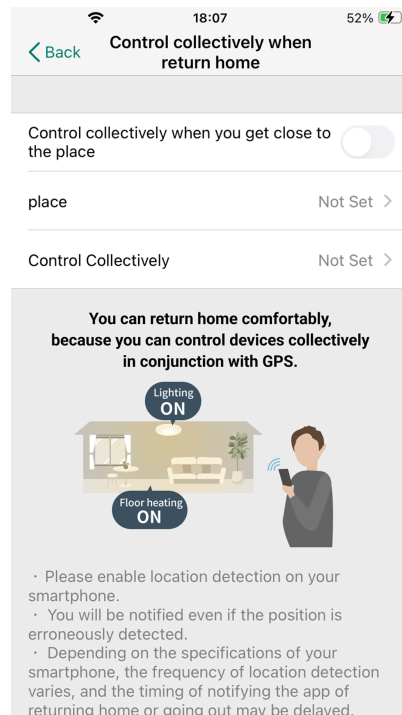

Choose your home location and things you want to control collectively.
  * To enable Control collectively when return home, your home location and things you want to Control Collectively must be specified in advance.
  * If AiSEG2 is not connected to the base unit, control collectively cannot be set on the base unit, so "Control collectively when return home" cannot be used.

- Return Home Notification
  Notifies which family member is back home based on his/her ID Auth Key or Private Passcode. And set the Control collectively when return home.
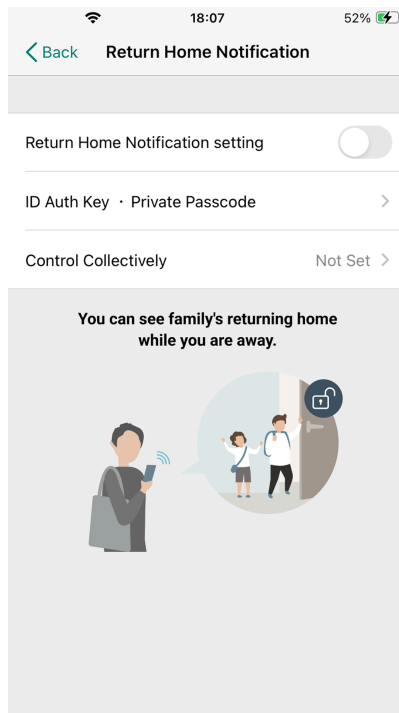

- ○ Return Home Notification setting
  Set ON or OFF of Return Home Notification.
  * Set a nickname on your ID Auth Key or Private Passcode in order to be notified of return home message from the Main Entrance. The ID Auth Key or Private Passcode that has not been set does not receive the notification.

○ ID Auth Key・Private Passcode
Receive a Return Home Notification by setting a nickname for your ID Auth Key or Private Passcode.
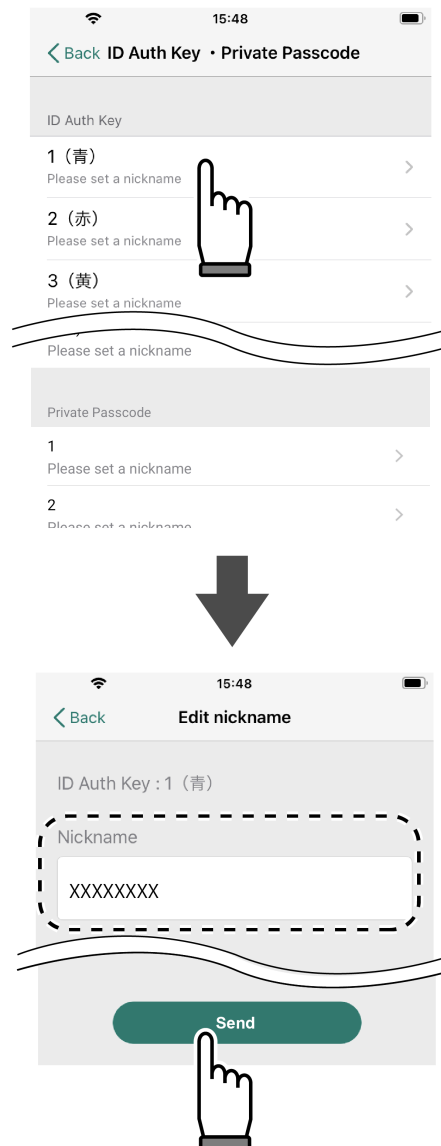

○ Control Collectively
Set the "Control collectively when return home" setting.

- If GPS location services are disabled on your smartphone/tablet, enable them.
  * GPS location services are the area information that indicates the approximate location of your smartphone/tablet.
- If location services are disabled on your smartphone/tablet, some functions may be unavailable.
- If you are using a device with iOS 15.7 installed, the location information might not be notified to the app, rendering it unusable. Please update your iOS.
- Panasonic does not collect any location information set by users of this service.
- Some smartphone/tablet models allow you to change the degree of accuracy of the location information. Change as appropriate.
- When using "Control collectively when going out" or "Control collectively when return home", always set the GPS of the smartphone/tablet to allow and set it to high accuracy.
  ※Please check the instruction manual of your smartphone/tablet for the setting method.
- Location services may be unavailable depending on your smartphone/tablet model and settings.
- Since the location detection frequency varies depending on the smartphone/tablet specification, there may be delay in the notification when leaving from/returning to your home.
- Information provided by GPS location services may not always be the best depending on GPS signal reception status or energy saving settings.
- Location may not be detected normally when the application runs in the background due to the energy saving settings on your smartphone/tablet; correct it as required.

- Energy saving settings may have a different name such as battery saving settings depending on your Android device. Confirm by reading your device operating instructions.
- We recommend that you turn on the notification settings on your smartphone/tablet. If turned off, this app will display a caution message.
- If no scene information is registered, the button for the Convenient feature related to that scene information will not be displayed.
- If the scenes set on "Control collectively when going out" "Control collectively when return home" or "Return Home Notification" are deleted on the base unit, the scenes stops working.
  Set the scenes you will perform again.
- Using a half-width symbol for your nickname, it may not be displayed correctly in the notification.

Service usage extension

This service will become unavailable for use on your smartphone/tablet after the expiration date[*], which is counted from your registration.
To extend the service expiration date, read the QR code on the Base Unit.

1. Tap "Service usage extension" from the menu.
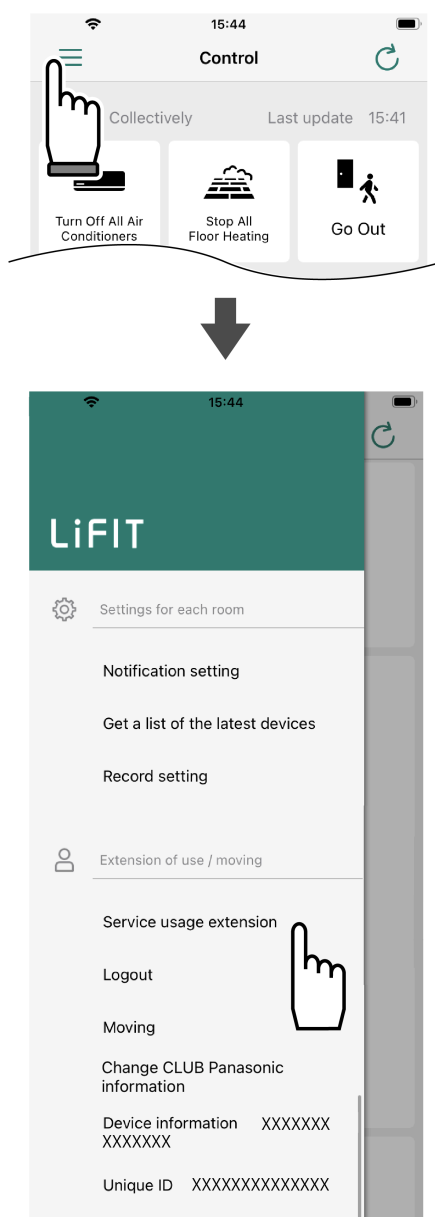

2. You can confirm the new expiration date on the Service usage extension screen. Extension of the expiration date is possible from two weeks before the expiration date.

3. When your service expiration date gets close, display the QR code on the Base Unit, and press the Usage extension button to read the QR code to extend the expiration date.

- If the expiration date has passed, you will not be able to use the LiFIT App.
  In that case, tap the usage extension button from the above screen, read the QR code displayed in "Setting" → "Mobile" → "Register" of the base unit, and extend the service expiration date.

Caution

- The expiration date varies depending on your condominium. Confirm with your condominium management association.
  * If the smartphone and Base Unit are connected to the same network, the expiration date is automatically extended via the network.
- If you register with the VPN connection worked on your smartphone/tablet, service usage extension may fail. Turn off the VPN connection and register.
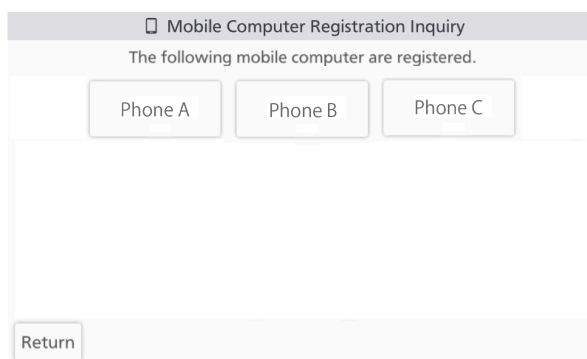

Inquiring registered devices

This operation must be performed on the Base Unit.

1. Display the Setting (Mobile) screen.
2. Touch "Inquire".
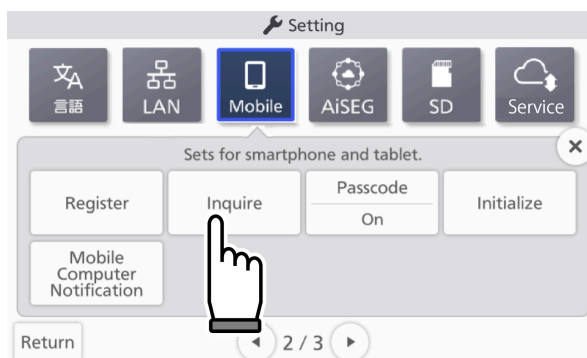

The registered smartphones/tablets display.
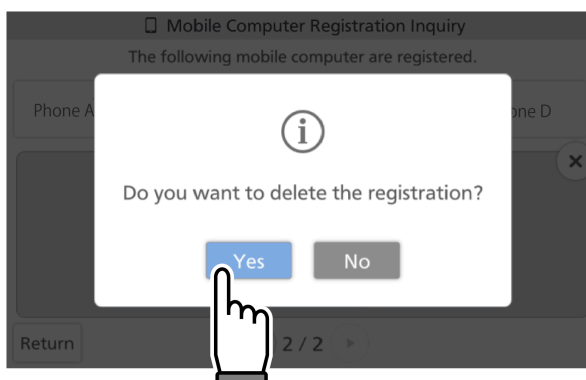

Deleting a registered device

If you are transferring or disposing of your smartphone/tablet, delete its registration from the Base Unit.

This operation must be performed on the Base Unit.

1. Inquiring registered smartphones/tablets.

2. Choose the device to delete from the displayed list of devices,
   touch "Delete the Registration".
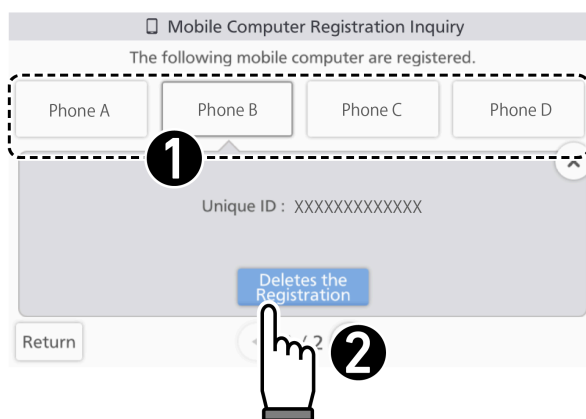

3. Touch "Yes".

The registration deletion starts.

- Touching "No" returns the screen to the Mobile Computer Registration Inquiry screen.

- The deletion completed message displays when the registration deletion ends. Touching "Confirm".
  If other registration remains, the screen returns to the

Mobile Computer Registration Inquiry screen.
If no registration remains, it returns to the Setting (Mobile) screen.
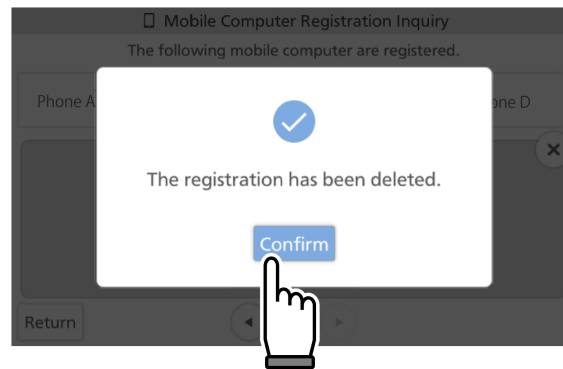

Changing the passcode

This operation must be performed on the Base Unit.

1. Display the Setting (Mobile) screen.

2. Touch "Passcode".

3. Enter the passcode input at the time of registration and touch "Confirm".

**Caution**

If a passcode has not been set, a screen different from that above displays.
Set a passcode

4. Enter a new passcode and touch "Confirm".

- For the setting method, please refer to [If you touch "On"] of "Registering a smartphone/tablet with the Base Unit"

- If not setting a passcode, touch "Off", and then touch "Confirm".

Initializing the mobile settings

This operation must be performed on the Base Unit.

1. Display the Setting (Mobile) screen.

2. Touch "Initialize".
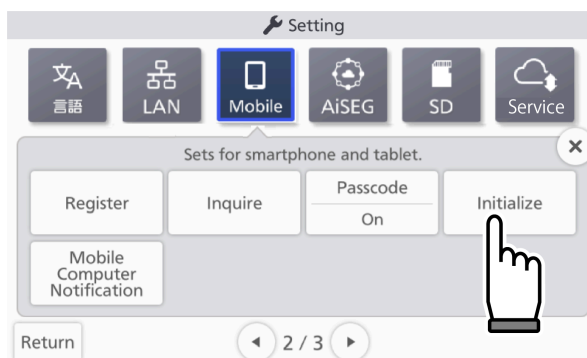

3. Touch "Yes".
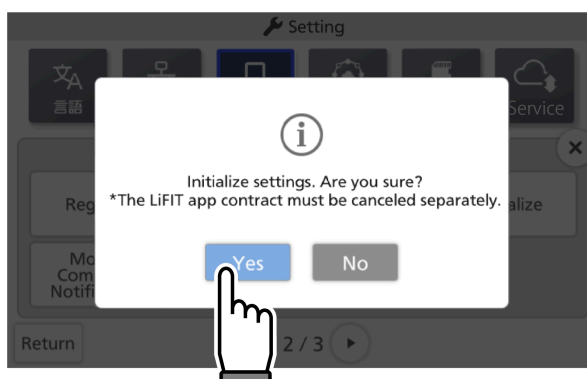

The initialization of mobile settings starts.

- ○ Touching "No" returns the screen to the Setting (Mobil e) screen.

- ○ The initialization completed message displays when the initialization of mobile settings ends. Touching "Confir m" returns the screen to the Setting (Mobile) screen.
Caution

- If you initialize the mobile settings, the passcode will also be initialized.

Stopping the service

If you are moving out of the apartment, stop the service to protect your privacy.

The method for stopping the service varies depending on whether "LiFIT App Contract" is displayed under "Register" by touching "Mobile."

When "LiFIT App Contract" is not displayed under "Register" by touching "Mobile" on the Base Unit.

1. Tap "Moving" from the MENU.

2. Specify the date and tap the "Registeration" button.

Caution

- You can specify a date three months in advance to stop the service. The date to stop the service can be changed if done before the due date.
- The service will become unavailable from 0 am on the due date, with the smartphone device information registered with the Base Unit and server deleted simultaneously.
- Registering a service stop date displays a button to cancel the service stop date.
- At the time of moving out, Stop Service also on the Base Unit to protect your privacy.
  * Refer to your Base Unit operating instructions.
